FORGET THE KEYS, UNLOCK WITH YOUR FINGER...

MISSION STATEMENT

Navkom is one of the leading European developers and producers of biometric access control devices, mainly for private use and small companies. In addition to offering our own range of products, we're developing and producing custom solutions for entrance door manufacturers and other access control related companies.

The company started dealing with biometrics in 2006 and quickly became recognized for simple yet powerful solutions and set new standards for home biometric market. Today, Navkom offers a full range of products for more comfortable and secure access to your homes and offices.

When designing our products, we follow a few simple but clear guidelines: quality and security, combined with user friendliness and modern design. We started the company with a mission to make biometric products available for everyday use and with the number of sold products well in 5 digits, we know we're on the right track.

FINGERPRINT READER **REX** bioreader

It is one of the smallest and thinnest fingerprint readers on the market. Its aluminium casing is a sleek and inconspicuous design feature, suitable for any modern entrance door. Being remote-controlled, the REX bioreader casing has no keys or movable parts; it can trigger another device (e.g. an alarm, a second entrance, etc.). It can also be wall-mounted or flush-mounted over an electrical box.

REX bioreader package	R2BR1
external unit, internal unit, remote control, wiring	

Dimensions: 81 x 37 mm

Installation method: in the door leaf, wall-mounted on 30° holder or flush-mounted

Administrator memory slots: 3

Fingerprint capacity: 1000

Relay outputs: 2

Sensor: area capacitive with 3D imaging

Device management: with remote control

REX touchpad CODE KEYPAD

REX touchpad is a classic-style code keypad with touch screen and blue backlight. It's been designed in a way to be easily installed inside the door leaf but can also be wall-mounted or flush-mounted. It consists of two units. Internal unit is always placed in the safe place (inside the door leaf or in a fuse box) and the communication between the units is protected by 256-bit rolling code.

REX touchpad package	R2TP1
external unit, internal unit, wiring	

Dimensions: 81 x 37 mm

Installation method: in the door leaf, wall-mounted on 30° holder or flush-mounted

Administrator code capacity: 1

User code capacity: 99

Relay outputs: 2

Code length: 4 - 16 characters

Backlight: blue

BLUETOOTH™ UNIT **REX** bluetooth

REX bluetooth is a small and compact unit with an aesthetically pleasing flush mount design which unlocks the door with the help of a phone. Once a mobile phone is paired with REX bluetooth and is in its range (approximately 2 m), blue backlight on the touchscreen of REX bluetooth starts flashing and a beep is heard. When the Bluetooth sign on the touchscreen is pressed, the door unlocks. REX bluetooth has two relay outputs, which enables it to control the alarm or open another door.

REX bluetooth package	R2BT1
external unit, internal unit, wiring	

Dimensions: 81 x 37 mm

Installation method: in the door leaf, wall-mounted on 30° holder or flush-mounted

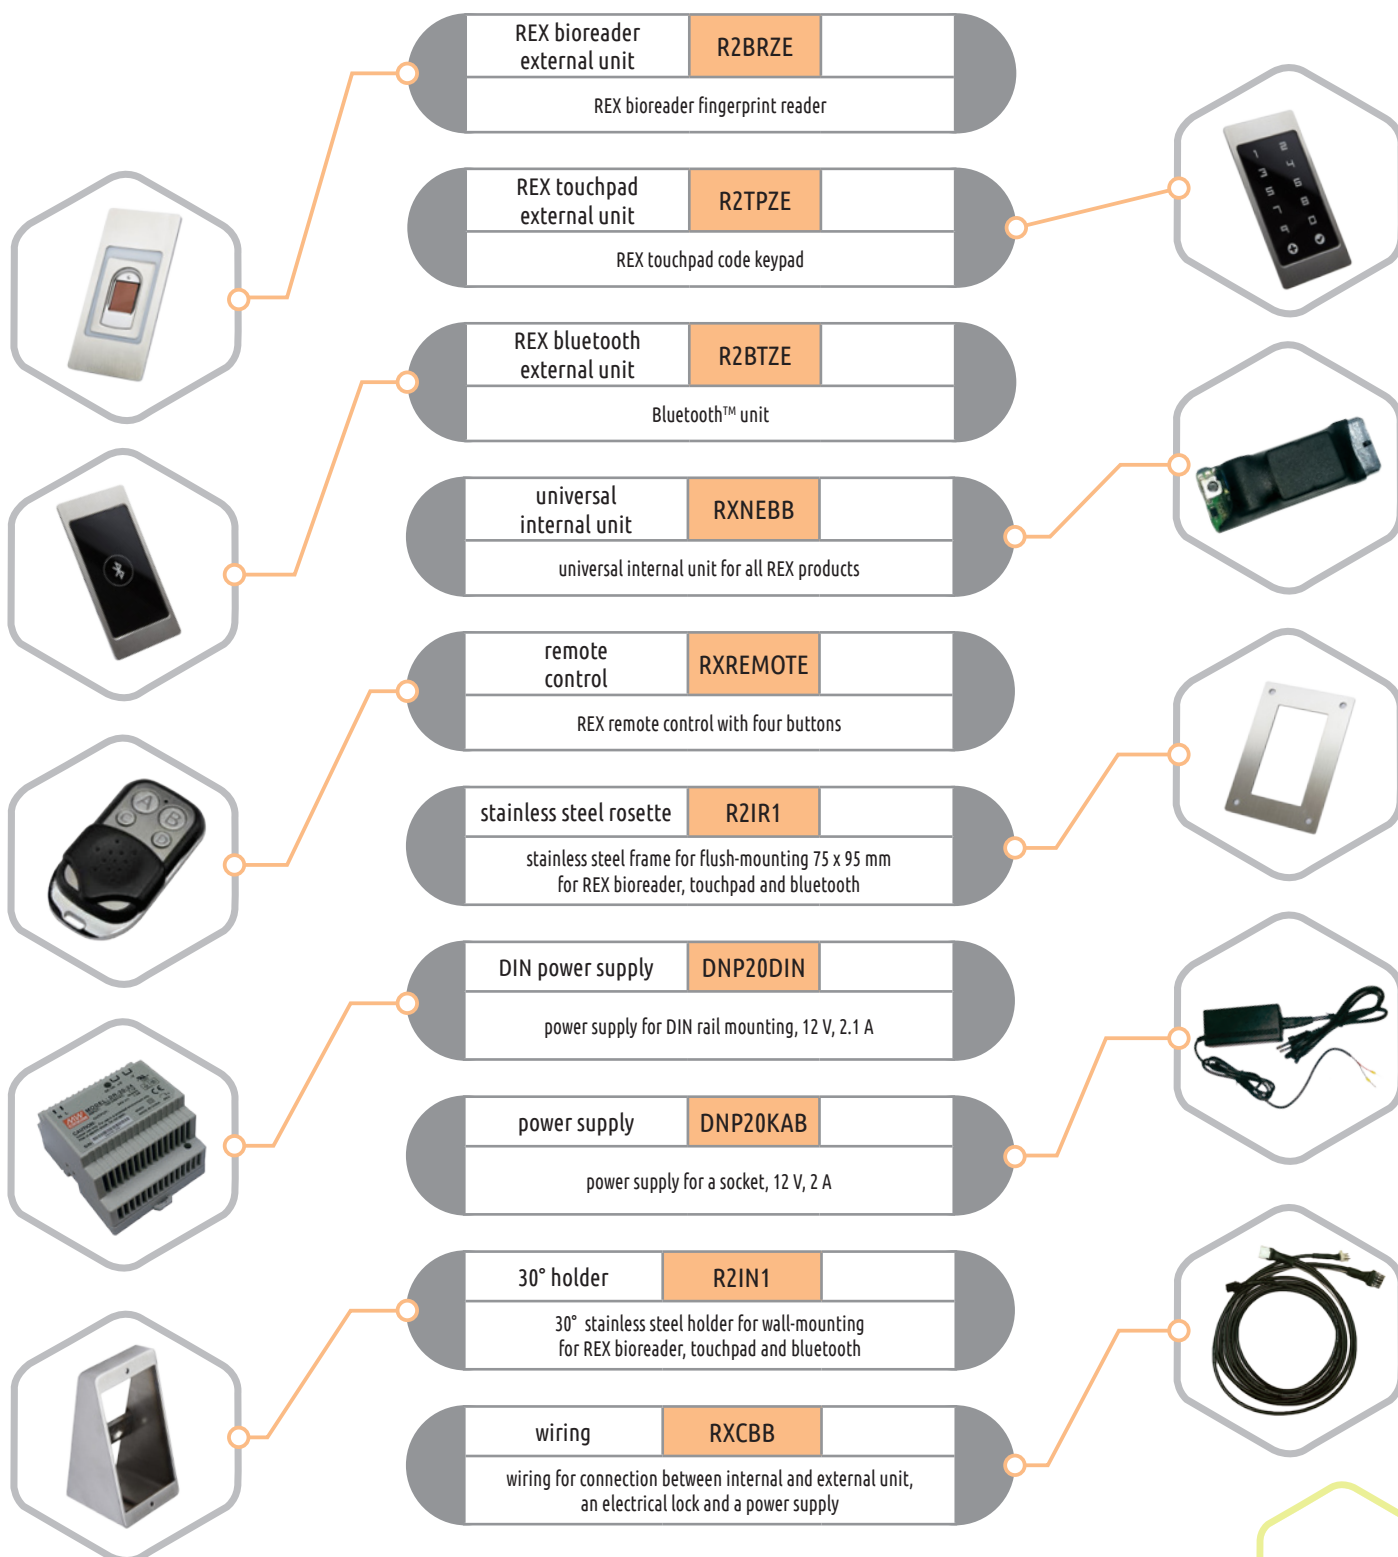

Paired phones capacity: 100

Relay outputs: 2

Backlight: blue

ADD-ONS AND SPARE PARTS

FRONT DOOR HANDLES WITH AN INTEGRATED FINGERPRINT READER

REX
handle

R
SERIES

ROUND HANDLE Ø 30 MM

Today, stainless steel handles are incorporated in virtually all modern high standard entrance doors. REX handle brand is a line of stainless steel door handles with integrated fingerprint readers. The convenient placement of the capacitive area sensor on the handle enables the user to unlock and open the door at the same time. On the side, facing the user is a LED indicator while the sensor and two buttons for programming face the door. REX handle has two relay outputs, so it can unlock the door and trigger another device (alarm, garage door, etc.).

REX handle R series is an array of round stainless steel handles (Ø 30 mm). It consists of three segments, fingerprint sensor is integrated in the middle one. It is mounted on the door by two or three either 90° or 45° mounting elements (depends on the length of the handle). The exit of the connection cables is through the upper mounting element.

Sizes: 600-1800 mm

Material: brushed stainless steel

Mounting angle: 45° or 90°

Installation method: on the door leaf

Administrator slots: 3

Fingerprint capacity: 1000

Relay outputs: 2

FRONT DOOR HANDLES WITH AN INTEGRATED FINGERPRINT READER

SQUARE HANDLE 30X30 MM

Today, stainless steel handles are incorporated in virtually all modern high standard entrance doors. REX handle brand is a line of stainless steel door handles with integrated fingerprint readers. The convenient placement of the capacitive area sensor on the handle enables the user to unlock and open the door at the same time. On the side, facing the user is a LED indicator while the sensor and two buttons for programming face the door. REX handle has two relay outputs, so it can unlock the door and trigger another device (alarm, garage door, etc.).

REX handle Q series is an array of square stainless steel handles (30 x 30 mm). It consists of only one piece with a fingerprint sensor integrated on the side facing the door. It is mounted on the door by two mounting elements (either on the ends of the handle or slightly tilted towards the center). The exit of the connection cables is through the upper mounting element.

Sizes: 600-1800 mm

Material: brushed stainless steel

Installation method: on the door leaf

Administrator slots: 3

Fingerprint capacity: 1000

Relay outputs: 2

FINGERPRINT READER

REX
indoor

REX indoor is our first fingerprint reader, made for installation in the door leaf. It is programmed by two buttons, located on its stainless steel casing. The status of the device is indicated by a three-colour LED and an integrated beeper. It is fairly simple to operate with REX indoor. To unlock the door you simply place your finger on the sensor (or first press one of the buttons if the device is in the sleep mode). To enroll and delete users use the two buttons and all actions need to be confirmed by an administrator fingerprint.

Dimensions: 52 x 75 mm

Installation method: in the door leaf, wall-mounted on 30° holder or flush-mounted

Administrator memory slots: 3

Fingerprint capacity: 1000

Relay outputs: 2

Sensor: area capacitive with 3D imaging

Device management: with two buttons on the casing

ADD-ONS AND SPARE PARTS

BATTERY POWERED CYLINDER LOCK WITH AN INTEGRATED FINGERPRINT READER

BARVNI ODTENKI

REX cylinder is a patented revolutionary novelty in the segment of fingerprint readers. Mountable in any left or right door featuring a Euro profile door lock, it combines a cylinder lock with a fingerprint reader. It is powered by two AA 1.5V batteries, but it also allows for emergency power supply from the outside, should the batteries go completely empty. The expected battery life is at least 12 months with normal use. REX cylinder can be programmed with a help of an enclosed remote control which can also be used for unlocking. REX cylinder can always be locked from the outside (even without fingerprint verification) but always lock and unlock from the inside with the help of a lever on the knob.

The first three fingerprint memory slots are reserved for administrative fingerprints. One of those has to be always present when enrolling or deleting user fingerprints. REX cylinder is patented under the patent number P-201500016.

REX cylinder package silver R4SILVER

REX cylinder, remote control, batteries, 2 x hex key

REX cylinder package black R4BLACK

REX cylinder, remote control, batteries, 2 x hex key

Administrator memory slots: 3

Fingerprint capacity: 1000

Sensor: area capacitive

Device management: with remote control

INSTRUCTIONS FOR CYLINDER MEASUREMENTS / SPARE PARTS

1 Inner side of the door

2 Outer side of the door

3 Lock shield on the outer side of the door

4 Lock shield on the inner side of the door

5 Lock

6 Screw for fixing the REX cylinder

7 Rosette

8 Required cylinder dimension, by which 2 distances are taken into account: **A** - between the inner shield and the middle of the screw for fixing the cylinder and **B** - between the outer shield and the middle of the screw for fixing the cylinder and **C** - between the end point of the cylinder and the outer edge of the rosette.

When ordering, please specify all 3 measurements.

remote control

RXREMOTE

REX remote control with four buttons

FINGERPRINT READER

ARX one is a fingerprint reader with a thermal swipe sensor in a plastic casing that resembles a light switch. It can be wall-mounted or flush-mounted so it is a good choice for a harsher environment where installing in the door leaf is not possible. It is available in four different colors.

It is fairly simple to operate with ARX one. To unlock the door you simply swipe your finger over the sensor. To enroll and delete users you use the two buttons. The first three memory slots are reserved for administrator fingerprints, while all the rest are user memory slots. Enrolling or deleting a user has to be confirmed by an administrator finger.

Dimensions: 83 x 83 mm

Installation method: wall-mounted or flush mounted over electrical box

Administrator memory slots: 3

Fingerprint capacity: 1000

Relay outputs: 2

Sensor: thermal swipe

Device management: with two buttons on the casing

ADD-ONS AND SPARE PARTS

FINGERPRINT READER FOR ACCESS CONTROL

It looks very similar to ARX one but it has no buttons on the casing and is controlled via Bluetooth through an app installed on your smartphone, tablet or laptop. It also offers much more: it enables viewing the event log, a restrict access at a specific time or zone, and the transfer of users from unit to unit.

What does ARX manager offer?

- 3 relay outputs
- scheduled entries
- history of events
- advanced user management
- up to three fingerprint readers in a system

Dimensions: 83 x 83 mm

Installation method: wall-mounted or flush-mounted over electrical box

Administrator memory slots: unlimited

Fingerprint capacity: 1000

Relay outputs: 3

Sensor: thermal swipe

Device management: via the application on a smartphone, a tablet or a computer
